In response to applicant's letter dated Sep 27, 2004. The following action is taken:

The claims are rejected for the same reasons set forth in the previous office action mailed March 10, 2004.

Applicant's arguments filed Sep 27, 2004 have been fully considered but they are not persuasive. Applicant's arguments are centered around the prior art not showing or teaching a "light beam emitters" as opposed to the prior art showing an "electron beam emitters". The claims are not drawn to the use of laser beam sources nor the use of laser diode sources. The claims are drawn to the use of light beams emitters. Therefore, the examiner sees no patentable distinction between the use of a light beam (as claimed) and an electron beam (as cited in the art) in reading or writing data into a medium within the claimed apparatus. The examiner maintains the rejection of claims 1-25 under 102(e) using the 6473388 reference, since contrary to applicant's arguments no declaration have been received.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory

action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
